PREAMBLE

GITAM (Deemed to be University) focuses on providing a progressive and versatile learning environment for the students in their chosen programmes, thus contributing to the general well-being of society at large.

Given the aspirations and multitalented capabilities of the present generation of students, a learner-centric approach is adopted at GITAM. The required essentials are identified, and the students are guided by teams skilled in various fields such as academics, sports, cultural activities, entrepreneurship, etc. The goal is to provide a holistic learning experience, enabling students to gain command and progress towards excellence in the chosen field and become socially responsible citizens.

In this rapid digital evolution era, the role of a university is crucial to produce graduates with the required skills. Current-generation graduates need to collaborate with teams in a multidisciplinary environment to solve complex problems and possess communication, critical thinking, and technology skills. To produce graduates who will contribute once they leave the portals of the University, GITAM collaborates with several organizations, providing a platform for students to acquire the necessary skills. GITAM updates its curriculum, mode of delivery, and assessment tools with the current practices from around the globe.

This document provides an insight into the academic culture of the University, procedures, and regulations of the courses taught at GITAM. The regulations are designed to deliver memorable experiences to courses that are led by instruction. All students are expected to be familiar with the regulations given in this document and the subsequent revisions that are released from time to time.

1. About GITAM

1.1. Introduction

Gandhi Institute of Technology and Management, popularly known as GITAM, was founded in 1980 by an inspired group of eminent intellectuals and industrialists of Andhra Pradesh led by Dr. M. V. V. S. Murthi, former Member of Parliament, and popular philanthropist. The vision of MAHATMA, the Father of the Nation, was to see India as a socially and economically resurgent country, and the MAHATMA looked upon education as an important means to achieve this goal. He envisaged universities as institutions of higher learning that transcend all linguistic, racial and other barriers. GITAM is committed to imbibing his values and abiding by his philosophy.

1.2. Vision

GITAM will be an exceptional knowledge-driven institution advancing on a culture of honesty and compassion to make a difference to the world.

1.3. Mission

- Build a dynamic application-oriented education ecosystem immersed in holistic development.
- Nurture valuable futures with global perspectives for our students by helping them find their ikigai.
- Drive impactful integrated research programmes to generate new knowledge, guided by integrity, collaboration, and entrepreneurial spirit.
- Permeate a culture of kindness within GITAM, fostering passionate contributors.

1.4. Quality Policy

To achieve global standards and excellence in teaching, research, and consultancy by creating an enabling environment in which the faculty and students share a passion for creating, sharing and applying knowledge to continuously improve the quality of education.

2. Purpose & Scope of the Regulations

GITAM's Academic regulations provide a framework for the functioning of all programmes of study in the University. The regulations include procedures and practices that are to be followed to ensure academic standards in the University. The Academic Council (AC) approves the regulations of GITAM. These regulations may be amended with the approval of the Academic Council to meet evolving conditions. The updated regulations will come into effect from the next academic year. GITAM, at its discretion, may introduce changes during a session where it is necessary because of the changed circumstances or mandated to do so by the statutory bodies. Communication regarding amendments to the regulations will be published on the University website and sent through the University mail system. For messages received from any other mode of communication, the student has to verify the authenticity by visiting the university website. Students must follow the amended regulations as they might impact the process for the award of the degree. The regulations apply to all GITAM undergraduate students in the Schools of Computer Science and Engineering and Core Engineering.

2.1 Current and Official Version of Academic Regulations

The Academic Regulations provide a framework for the education delivered and administered by GITAM University. The Board of Studies, acting through the academic administration, is responsible for implementing the Regulations. All registered students are subject to the Regulations and must agree and abide by the regulations as a condition of enrolment. The students registered at the GITAM Deemed to be University are subject to the University regulations and revisions until the award of their degree.

2.2 Updates to the Regulations

Updates to the regulations are typically published at the start of the academic year and will remain in force till a subsequent version is published. The current version of the academic regulations supersedes all previous academic regulations, and it will remain in effect until the next revision following the aforementioned provisions. Current academic regulations of GITAM are identified with the highest version number and will be communicated to the students through mail, official circular, and the website. The official version of the academic regulations is also uploaded to the GITAM website at <https://www.gitam.edu/academic-regulations>. The Directorate of Academic Affairs (DOAA) will maintain the official version of the academic regulations and update the information on the website. The DOAA maintains archives of all academic regulations.

3. Rights and Responsibilities

This section provides information about the student's rights and responsibilities at GITAM. Procedures are established to ensure that students benefit from the practices followed at GITAM. As a member of the GITAM family, students can expect to be a part of an engaging, challenging, creative, and innovative environment. A student is expected to be aware of all the rules and processes of the University. As members of GITAM, students shall have certain rights and responsibilities, which are not limited to:

3.1 Student Rights

1. Right to pursue education in a secure environment by not being subjected to harassment and discrimination.
2. Access to high-quality academic and infrastructure resources.
3. Access to activities beyond the classroom that support holistic development, including intellectual and personal.
4. Students have the right to freedom of expression and association with other organizations while not interfering with the rights of others.
5. Access to mental wellness service programs.
6. Right to access student bodies/clubs based on the policies and guidelines currently enforced by these organizations.
7. Expect timely and polite responses from the University's academic and administrative departments.

3.2 Student Responsibilities

1. Respect and act consistently with the values, rules, and regulations of the University.
2. Obey government rules and regulations.
3. Carry oneself in a manner that contributes to an atmosphere of learning and free expression.
4. To become familiar with course outlines, content, evaluation methods, timelines, and procedures.
5. Resolve academic and personal problems by communicating with personnel from Academic Affairs and Student Life.
6. Keep the University authorities informed of any changes in personal status and contact information, including guardians/ parents.

7. Strictly adhere to all health and safety procedures outlined for classrooms, laboratories, field trips, sports, and cultural activities.
8. Be acquainted with the academic regulations and keep abreast of the updates in the regulations.
9. Familiarize with published information that will allow the selection, by due deadlines, of the appropriate paths of academic study.

4. Admission

The admission policy and procedure are revised based on the University Grants Commission (UGC) guidelines or the Ministry of Higher Education (MHE), Government of India. The number of seats in each degree programme is determined by regulatory bodies such as AICTE/UGC/Various Councils, Government of India regulations, and market trends.

To be eligible for admission into Undergraduate programmes at GITAM, the applicant must fulfil the prescribed eligibility criteria and satisfy the entrance requirements specified by GITAM admission regulations and guidelines of statutory councils for various programmes. The student must undertake a national-level entrance exam GITAM Admissions Test (GAT) conducted by the University. Students can also secure a seat in GITAM by qualifying in the specified state or national level examinations. The counselling schedule will be announced in the media, and the selected candidates will be admitted into the programme of their choice based on the availability of seats. Candidates admitted to undergraduate programmes must meet programme-specific requirements and academic performance in Class XII or its equivalent.

Admission is based on merit, and merely meeting the requirements may not ensure admission. The University does not discriminate based on gender, race, religion, disability or nationality. GITAM reserves the right to admit any candidate based on the criteria specified in the [Admission Policy](#). Admissions are also available for Non-Resident Indians and foreign citizens who meet the GITAM entrance eligibility criteria.

4.1. Student Classification

4.1.1 Regular admission

Admission is considered regular if a student of Indian nationality is admitted to the programme's first semester through the GITAM admission test or any national-level entrance exam approved by the Directorate of Admissions. For a GITAM degree to be awarded, the student must complete the terminal year in GITAM, unless the student is a member of twinning programmes approved by GITAM.

4.1.2 Lateral admission

Lateral admission is of two types:

1. Students pursuing an undergraduate programme in any recognized Higher Education Institute (HEI) could be admitted into GITAM without appearing for the entrance exam to continue their studies. In this case, the student shall furnish the transcripts or grade cards, syllabus copies, educational certificates, and other relevant documents while applying for admission. The Board of Studies (BoS), which manages the programme, will establish the equivalency based on the marks/credits obtained in the courses in the previous HEI. Regarding the courses in GITAM for which an equivalence could not be found, the candidate must secure the grade/credits by registering for the courses at GITAM. A minimum of 50% of the credits for the program must be completed at GITAM to earn the degree from GITAM.
2. The students who have completed their diploma programme in recognised institutes can be admitted into the third semester of the undergraduate programme.

In either case, the candidate must satisfy the admission criteria for a specific programme at GITAM.

4.1.3 Admission of B.Tech Students in other branches of Engineering

B.Tech students can opt to enroll in other branches of Engineering and earn an additional degree after completing the first degree. The student shall be exempted from registering for courses completed in the first discipline of the B.Tech programme, subject to approval from the BoS of the additional degree. The student can complete the additional B.Tech degree in two(2) or three(3) years without compromising on the programme's requirements.

4.2. Eligibility criteria

The eligibility criteria for various programs under different schools can be referred to [here](#).

4.3. International Students

To increase the diversity of the student population, GITAM admits students under Foreign Nationals (FN)/ Overseas Citizen of India (OCI) / Children of Indian Workers in Gulf Countries and Southeast Asia (CIWGC-SEA) and NRI category as follows.

- Five (5) % of seats within the "Approved Intake" for each programme is allowed for admission under NRI category.
- 15 % of Supernumerary Seats over and above the "Approved Intake" for each programme is allowed for admission under FN / OCI / CIWGC-SEA category. 1/3rd of these 15 % seats shall be reserved for CIWGC-SEA category

GITAM admits Indian and International students with the qualifications recognised by the AICTE.

4.3.1 Eligibility criteria

- The medium of instruction in GITAM is English. Aspiring students are expected to be proficient in English. One of the qualifying examination subjects must be English for admission to the programmes in GITAM
- For Undergraduate programmes, the students are expected to have completed twelve (12) years of study, similar to the Indian school education system
- They must present a certificate of permission from the School and certification from the Association of Indian Universities (AIU)
- If a student is not proficient in English as deemed by the University's tests, they will be required to take supplementary courses to improve their English proficiency.
- International students will be admitted based on the eligibility criteria set for the Indian residents by GITAM, except in programmes administered by professional councils. Exceptions in criteria for admissions will have to be approved by the individual Board of Studies (BOS).

4.3.2 Categories of International Students

- NRI: The candidate who is an Indian Citizen who is ordinarily residing outside India and holds an Indian Passport.
- Foreign National: The candidate who is a Citizen of a country other than India who is not of Indian origin as defined under OCI.
- OCI: The candidate who is a Foreign national, who was eligible to become a Citizen of India on 26.01.1950, or was a Citizen of India on or at any time after 26.01.1950, or belonged to a territory

that became part of India after 15.08.1947. Minor children of such people are also eligible for OCI. However, if the Applicant had ever been a Citizen of Pakistan or Bangladesh, he/ she will not be eligible for OCI.

- CIWGC-SEA: The candidate whose parents are working in Gulf countries or Southeast Asia is eligible under this category.

4.3.3 Selection Criteria

- GITAM International Test for Admission (GITA): The primary mode of admission for international applicants is through the GITAM International Test for Admission (GITA), which serves as the university's designated entrance examination for international admissions.
- Exemption from GITA: Applicants possessing valid scores in recognized competitive examinations such as SAT, EAMCET, JEE, NID DAT or CUET may be considered for admission with an exemption from appearing for the GITA examination, subject to programme-specific eligibility requirements.
- Mandatory Interview Process: Applicants falling under the Foreign National (FN) category, excluding nationals of Nepal and Bhutan, are required to undergo an interview process and should also qualify a mandated level (prescribed by the University) in Duolingo English Test as part of the admission procedure to secure a seat at GITAM.
- Interview Requirement for 100% GPMS: Apart from the written test, candidates belonging to the NRI, OCI, PIO, Nepal, and Bhutan categories are required to attend an interview if they are eligible and to be considered for the GITAM President's Merit Scholarship (GPMS), which offers up to 100% tuition fee waiver to meritorious students. Eligibility for the scholarship shall be determined based on the prescribed criteria and interview performance.

4.4. Scholarship Policy

GITAM offers scholarships/financial assistance to candidates based on the marks/ranks obtained in GAT and other common entrance tests conducted at the state and national levels for admission into undergraduate programmes. The current scholarship details can be referred to [here](#)

4.4.1 Scholarship regulations

Scholarships are awarded to prospective students to recognize their achievements in Academics, Sports, Culture, and diversity criteria as per the University's [scholarship policy](#). The University adjusts the scholarship amount towards the tuition fee. The University reserves the right to modify the policies from time to time.

5. Academic System

5.1. Academic Structure

The academic structure of GITAM Deemed to be University is governed by the Academic Council. It is chaired by Vice-Chancellor and comprises members from the Faculty, external members and special invitees. The Academic Council oversees the University's academic activity, i.e., teaching, learning, evaluation, etc. The academic organisation of GITAM consists of the following schools.

- 1) GITAM School of Architecture
- 2) GITAM School of Business
- 3) GITAM School of Computer Science and Engineering
- 4) GITAM School of Core Engineering
- 5) GITAM School of Education
- 6) GITAM School of Humanities and Social Sciences

- 7) GITAM School of Law
- 8) GITAM School of Paramedical Sciences
- 9) GITAM School of Pharmacy
- 10) GITAM School of Physiotherapy
- 11) GITAM School of Science
- 12) GITAM Institute of Nursing
- 13) Kautilya School of Public Policy
- 14) GITAM Institute of Medical Sciences and Research

The schools mentioned above are located across the four campuses at Visakhapatnam, Hyderabad, and Bengaluru. The academic administrators of those schools are responsible for introducing new programmes, curriculum development, curriculum revision, etc. The School's/Institute's prime responsibilities are monitoring the department's academic progress, preparing general guidelines in the teaching and learning process, monitoring the faculty performance, student discipline on campus, coordinating interdepartmental activities, etc. The departments/Institutes offer the programmes and provide the instructions required to run those programmes. Some schools/Institutes are situated on only one campus with a limited number of programmes, and students may not be divided into departments. In such cases, the School/Institute is responsible for framing the rules and regulations right from introducing a programme, curriculum development, teaching and learning process, providing instructions to conduct the programmes, and leading to degrees and certificates.

5.2. Semester System

A semester is an academic term. Two consecutive terms starting with the Odd semester (I, III, V, VII) followed by the Even semester (II, IV, VI, VIII) constitute one academic year. The odd semester typically commences in June and ends in mid-November. Even semesters begin at the end of November or early December and end in April, followed by the summer break. Deviations in commencement and closure due to holidays, closures required by regulatory bodies/ Government, natural calamities, including pandemic situations, and other reasons will be notified by the Registrar to the student's email. They will also be available on the website. The student has to register for courses each semester, subject to the fulfillment of pre-requisites. The maximum number of credits that a student can register for in a particular semester is twenty-five (25). The minimum number is sixteen (16), except in the final semester if the student will fulfil requirements for graduation with less than sixteen (16) credits. The course syllabi will be made available on the website. The lesson plan and assessment methods will be communicated on the first day of instruction and will also be available on the Learning Management System (LMS). Classwork will be conducted as per the lesson plan and scheduled during the timeframe of the semester. The University will communicate the grades obtained through the student information system. These grades will also be available on the National Academic Depository (NAD).

5.3. School Level Advisory Committee

The Dean of the School chairs the School Level Advisory Committee, consisting of all HOIs and the HODs of the School. The term for the members of the SLAC is for two years or until further orders, whichever is earlier. In the SLAC composition, the Dean of the respective School/ HOI is the Chairperson, and all HODs of respective Departments are the Ex-Officio Members. Nominees from Teachers, Students, alumni, Parents, Employers, Industry, and Funding Agencies form part of the members of the committee, and one of the HODs nominated by the Dean / HOI will act as Member-Convener.

The objectives of the SLAC are to scrutinize the School's Vision, Mission, Programme Educational Objectives

(PEOs) & Programme Outcomes (POs) of all the Programmes offered, Teaching, Learning & Evaluation (T-L-E) process, Student Support System, Extension Activities, etc., and offer suggestions for improvement.

5.3.1 Responsibilities of the School Level Advisory Committee

The SLAC meetings shall be conducted at least once in every Quarter of the academic year or two meetings per Semester, and the minutes of the SLAC meeting shall be submitted to the IQAC.

5.4. Curriculum

The programme curriculum is prepared with input from industry, society, and trends forecasted by various agencies, and in alignment with the respective regulating and approving agency requirements that govern a programme. The attainment of Programme Outcomes is measured to ensure that the said Programme Educational Objectives are met.

The curriculum includes the following:

5.4.1 Programme Specifications

Programme specifications include:

- a. Programme Code
- b. Regulations
- c. Vision and Mission Statements of the School / Department
- d. Duration of the Programme
- e. Program Educational Objectives (PEO)
- f. Programme Outcomes (PO)
- g. Mapping of the School mission statements with the Programme Educational Objectives
- h. Curriculum/Programme Structure with various categories of courses and credits
- i. Programme articulation matrix

5.4.2 Course Specifications

Course Specification includes,

- a. Course Description
- b. Course code & Course Title
- c. Credits
- d. Nature of teaching-learning process (LTPSJC)
- e. Course Educational Objectives (CEO)
- f. Number of contact hours
- g. Course Outcomes (CO)
- h. Module-wise syllabus & list of experiments if the course includes practical components
- i. List of text and reference books
- j. Course articulation matrix
- k. BoS & AC approval dates of the course
- l. Mapping of the course with relevant Sustainable Development Goals (SDGs)

5.4.3 Curriculum preparation

The faculty members at the School / Department level shall initiate the discussions on the Programmes to be offered for the ensuing Academic Year based on the stakeholder feedback & market trend analysis and in alignment with the regulations of the approving agencies. The Programme coordinator shall prepare the programme structure by consolidating the suggestions.

Based on the recommendations of the School Level Advisory Committee (SLAC) on Programme Educational

Objectives and Programme Outcomes for a specific programme, the structure, along with course syllabi, shall be prepared for the programme.

The proposed curriculum structure and syllabi shall be presented to the Board of Studies (BoS) and then to the Academic Council (AC) for approval.

Based on the suggestions from the Academic Council, additions and deletions to the programme specification and course specification shall be incorporated into the curriculum structure and syllabi.

The Dean of the School will be the Chairperson, BoS. A faculty member nominated by the Dean of the school shall act as Co-Chair, BoS. The DoAA publishes the official copy of the Curriculum.

5.2. School Committee (SCOM)

The Dean of the School chairs the School Committee, consisting of all HOIs and the HODs of the School.

5.5.1 Responsibilities of the School Committee

The School Committee meets once a month to review the progress of teaching-learning. The minutes of the SCOM meeting shall be submitted to the IQAC.

5.3. Programme Committee (PCOM)

Programme committees are constituted by the HOD/HOI for each programme, with the faculty members teaching the courses and a Professor of the core department as the Chairperson. The PCOM will be common for all the campuses. PCOM shall meet periodically to ensure the quality of teaching and learning during the semester.

5.6.1 Responsibilities of the Programme Committee

PCOM shall meet at least thrice in a semester with a specific agenda (not limited to) as follows:

Meet Number	Timeline	Agenda
1	Two (2) weeks after the commencement of the semester	Course Plan and review of the course committee meeting minutes
2	One (1) week after the sessional I feedback	Progress of classwork, Attendance Monitoring, Feedback, identification of slow learners and review of course committee meeting minutes
3	One (1) week before the closure of the semester	Progress of classwork, examination schedule, review of course committee meeting minutes, review of action taken on slow learners and suggestions for revision of curriculum and syllabus

The Chairperson shall submit the minutes of the meetings to the HoI.

5.4. Course Committee (CCOM)

The HODs shall constitute a course committee for every course of the programme to monitor the conduct of classwork. Committee members include:

- Senior Faculty of the Department - Chairperson
- Course Instructors from all campuses
- Student representatives

5.7.1 Responsibilities of Course Committee

CCOM shall meet at least twice a month during the semester with a specific agenda (not limited to) for each meeting as given below:

Meet Number	Timeline	Agenda
1	One (1) week after commencement of the semester	Course Plan and evaluation pattern
2	Every fortnight after the commencement of the semester	Progress of class work, Feedback, Course content on LMS, Syllabus coverage, development of question banks, use of MOOCs, identification of slow learners and suggestions for improving course delivery
3	Two (2) weeks before the closure of the semester	Progress of class work, examination schedule, review of action taken on slow learners and suggestions for revision of syllabus

The Chairperson shall submit the minutes of the meetings to the PCOM chairperson.

6. Programmes offered at GITAM

GITAM offers various programmes, including certificate, undergraduate, postgraduate, PG diploma, and Research. Each programme is identified with a unique code.

6.1. Programme Code

The unique programme codes shall be allotted to each programme on approval of the same in the Academic Council. Programme codes are alphanumeric with the first five characters as alphabets followed by two digits. The first alphabet represents the type of programme (Undergraduate/ Postgraduate/Research), followed by four alphabets that represent the Department/Institute offering the programme. The last two digits represent the serial number of the programme.

6.2. Minimum duration of the programme

The undergraduate programme in the School of Technology is for a minimum period of 4 years, and the B.Com. and BCA programmes, the minimum period is 3 years. The minimum duration of the programme for lateral admission students is the same as that of regular students. For students who have joined with the transfer of credits from the Academic Bank of Credits (ABC), 50% of the credits are to be earned in the programme enrolled at GITAM. The maximum duration of the programme is N+2 years, where N stands for the minimum duration of the programme as mentioned above. If the student has not obtained the minimum number of credits within the stipulated time, the Vice-Chancellor may extend the maximum duration in extenuating circumstances upon receiving a request along with reasons from the student for not completing the programme on time.

7. Structure of the Programme

The programme structure consists of various categories of courses incorporated in the curriculum to impart the required levels of knowledge, skills, and attitude. On completion of the programme, the student is expected to attain the programme outcomes as specified by the relevant professional bodies.

7.1. Courses and credits

Academic courses are based on a credit system. Each course offered in the University is allotted a certain number of credit hours. The number of credits is based on the hours of instructional contact in the classroom, laboratory, and the amount of work the student is expected to perform outside of class hours in a week. A classroom lecture/ tutorial/ skill development activity of 50 minutes per week, spread over the entire semester, shall be considered an instructional unit equal to one credit. A minimum of 100 minutes per week of laboratory session/ practical shall also be considered as one instructional unit and hence one credit. Fifty (50) minutes of project work per week, with 3 hours of work performed independently of the Instructor during the entire semester, is considered one instructional unit and one credit. Eight (8) hours in a day for four weeks is required for earning internship credits. The LTPSJC for each course represents Lecture (L), Tutorial (T), Practical (P), skill development (S), Project work/ Internship (J), and the total instructional delivery is indicated in hours, and the credits (C) indicate the effort.

7.2. Course classification

Courses are classified as University core, Faculty core, programme core, programme electives, and open elective courses.

7.2.1 University Core (UC)

Courses listed under the University core are common to all undergraduate-level programmes offered in the School of Technology, except B.Tech. (CSBS), B Com programme from the School of Business and BCA programme from the School of Science. These courses are introductory/basic to enhance the knowledge in multidisciplinary subjects apart from the student's own discipline, thereby enabling the student to develop as a holistic individual. The student must earn the specified number of credits in the University core. A variety of courses are offered in baskets to enable the student to choose as per his/her interest and requirements in certain categories. The courses offered in the University core may change based on the requirements, with inputs from the Academic Council. A student can opt for the University core courses in any semester of their study at GITAM. The current list of courses is given in Annexure-I. The university core courses include courses on Language Proficiency, Soft Skills, Venture development, overall development, etc., of which some of the courses are non-graded pass-fail courses.

7.2.1.1 English courses

To improve the proficiency of the students in English, the English department currently offers two courses. Students will have to take the TWO (2) courses. Students who are deemed to be proficient in English may opt to take courses for learning an Indian or Foreign language instead of English.

7.2.1.2 Soft Skills courses

The University offers a set of six (6) courses on Soft Skills. These courses have to be taken from Semester I in a sequence.

7.2.1.3 Venture development

The University has established a Venture Development Centre (VDC) for various entrepreneurship activities on the campus. All the students are required to take the beginner's course offered by the center to prepare students for entrepreneurship. The VDC allows the students to incubate their ideas into meaningful ventures. In subsequent semesters, the University offers programmes that enhance the entrepreneurial skills of the student.

7.2.1.4 Courses for overall development

The student can choose any TWO of the following FIVE courses.

- Sports
- Club activity
- Community service
- Personal financial planning
- Health and well-being

These courses have been designed to enhance the holistic development of the student.

7.2.1.5 Indian Constitution and History

This course enables the student to understand the basics of History and the Constitution of India.

7.2.1.6 Gandhian Ethics

The University offers a course titled "Gandhi for the 21st Century". This course enables the student to apply Gandhian Ethics in day-to-day life.

7.2.1.7 Environmental studies

To understand the impact of anthropogenic activity on the Earth, the University offers a course mandated by UGC. Students will have an understanding of sustainable development and awareness of various environmental issues.

7.2.1.8 IT productivity tools

A course on IT productivity tools is offered to equip the student with proficiency in using technology tools and enhance productivity in assignments, report writing, presentations, etc. The student will have to complete the prescribed Coursera courses during the Induction period, and a passing grade in the test conducted on the LMS (currently MOODLE) needs to be obtained.

7.2.2 Faculty Core (FC)

These are the courses common across all the programmes of the Schools of Computer Science and Engineering and Core Engineering. The courses in the faculty core are categorized into various sections. Each section consists of a basket of courses, from which the student can select courses based on their interest. Students must secure the minimum number of credits from their respective Faculty core, viz., Technology, Science, and Management.

7.2.3 Programme Core (PC)

Programme core courses are mandatory credit courses that the student must study to meet the programme's requirements. The courses and their content shall satisfy the specific programme outcome mentioned by the relevant professional bodies. The student has to complete all the courses mentioned under this category for a specific programme.

7.2.4 Elective courses

Elective courses are the courses that a student can choose from a list of approved courses based on their interest. Elective courses are further classified into programme and open electives.

7.2.4.1 Programme Elective

The parent Department/School/Institute offers programme elective courses to support the discipline, expanding the scope in the chosen specialization. An appropriate minimum number of such electives specified in the programme will lead to a degree with a specialization.

7.2.4.2 Open Elective

The students choose open elective courses from other academic disciplines to seek exposure in that discipline. Open electives impart knowledge in other areas that are offered within and outside of the schools. The integration of different domains explores new opportunities in solving problems and improving employability skills.

7.3. MOOCs

Flexibility is given to students to choose various courses provided through Massive Open Online Courses (MOOCs) during the study period. Students studying UG programmes are permitted to register for various courses on SWAYAM up to a maximum of 40% of the total credits of the programme in lieu of UC and Programme elective courses. Programme Core courses in the program cannot be replaced with a MOOC course unless explicitly approved by the BoS. Students who intend to transfer credits by undertaking a course through MOOCs must get prior approval from the faculty member handling that course and the BoS of the department/ school. Backlog courses can also be cleared through MOOC platforms for pre-approved courses with prior approval.

7.3.1 Establishment of equivalency and credit transfer

Upon successful completion of the courses undertaken by the student on SWAYAM/ MOOCs/ Coursera (with prior approval from the faculty handling the course), an equivalent Grade/Score will be awarded based on the Grade/Score obtained in an online course or an assessment conducted by the University. The respective Board of Studies (BoS) will decide the grading scheme to determine the equivalent grade and recommend the number of credits that will be transferred for the course.

7.4. Flexible Credit System

The main feature of the Flexible Credit System (FCS) is to make education student-centric rather than teacher or system-centric. It provides the opportunity to choose courses from a list of core, elective, and skill-enhanced courses. The students can undergo additional courses to acquire more credits, learn at their own pace, and adopt an interdisciplinary approach to learning. All programmes of study are designed to meet the specified number of credit requirements. The courses taken by the student in each semester as a part of the programme are allotted some credit points based on the number of hours assigned for teaching, tutorial, and practical. Some Non-credit (Audit) courses are also included in the curriculum; However, securing passing grades in these courses is required. Upon successful completion of the course, the student secures the number of credits allotted for that course. The credits earned in each semester are accumulated in the student's records in the form of a mark's memo. Once the minimum number of credits of the programme is achieved, the degree can be awarded, subject to the fulfilment of the conditions of the programme.

7.5. Minimum number of credits

All programmes of study are defined in terms of their credit requirements. The student takes each course as part of the programme and will earn the specified number of credits for that course upon successful completion of the course. Once the minimum number of credits are accumulated, the student will be awarded the degree if all other relevant conditions specified in the curriculum are satisfied. Mere accumulation of the minimum number of credits may not result in the award of the degree. Each programme follows a structure and incorporates it into the curriculum. Every programme has the stipulated University Core Courses (graded and non-graded), Faculty Core Courses, Programme Core and Elective Courses, and Open Elective Courses. The structure also includes Project work, internship, seminar, etc., with due weightage given in the curriculum. Even though the student attains the minimum number of credits, if

they do not meet the pattern provided in the program structure and other mandatory requirements, the student will not be eligible for the award of the degree. Further, a GPA requirement (currently 5.0) is specified for each program.

7.6. Course Plan and Syllabus

Course plans are devised by the instructors based on the approved syllabus of the course. If more than one Instructor handles the same course, course plans are typically finalized after a discussion among all the course instructors. The responsibility of finalizing the course plan is with the campus-specific course coordinators. The course coordinator shall be a senior faculty member, on rotation, offering the course for that academic semester, and will provide the following information in the course plan.

1. Course title, code, and complete syllabus
2. Course identification and classification
3. Instructor identification and contact details
4. Course objectives and learning outcomes
5. Required materials (textbooks, references, lab manuals, website information, videos, etc.)
6. Course schedule (timetable)
7. Course calendar (Assignment due dates, class test dates, quizzes, etc.)
8. Guidelines for class participation and attendance requirements
9. Evaluation procedures (Continuous and End-semester examinations)

The course coordinator will distribute the course plan to the students through the course Instructor during the first week of the scheduled commencement of the course using the LMS (Learning Management System) adopted by the University.

7.7. Course code Scheme

The course code is unique for every course, and it helps the students to identify which department/School/Institute offers the course. Some of the courses, viz., NCC, NSS, Yoga, etc., are offered by University Level Directorates.

The course code scheme up to 2023 -24 AY consists of four (4) alphabets and four (4) digits. The first four (4) alphabets represent the Department/School/Directorate, which offers the course. The first digit represents the "Level of course", followed by the last three digits representing the "Course Number".

From 2024-25 AY onwards, the course code is a ten-character alphanumeric code. The first two digits represent the last two digits of the beginning of the AY in which the course is introduced, followed by four (4) uppercase alphabets representing the Department/School/Directorate, which offers the course. In the concluding four (4) digits, the first digit represents the "Level of course", followed by the last three digits representing the "Course Number".

8. Academic Calendar and Registration

8.1. Academic Calendar

The academic calendar serves as a comprehensive guide for students and faculty members, detailing important dates and events throughout the academic year. Flexibility is acknowledged, and any changes are communicated through authorized channels and updated on the institution's [website](#).

It includes critical dates for various activities throughout the academic year. This encompasses the commencement and closure of classwork, summer internship, summer vacation, examination schedule,

state and national holidays, semester break, and course registration. The academic calendar is typically available at least two weeks before the start of every academic year. The office of DoAA is responsible for communicating the academic calendar to Departments/Institutes/Schools, and it is made accessible on the institution's [website](#).

Dates and schedules in the academic calendar may be subject to change, specifically in certain programmes, due to regulatory and local requirements. In cases where changes are necessary, the course instructor or academic head of the programme, with prior authorization, will communicate these changes to the students. Any revision will be updated on the institution's website to ensure that students have access to the most current information.

8.2. Academic advice

The university has established a structured academic advisory system and utilizes the Student Information System to guide students through course selection, registration, and monitoring progress, to facilitate timely degree conferment. New undergraduate students participate in an orientation programme before the first semester begins. Each student is assigned an academic adviser, a Mentor. Before registration, students are required to consult their advisers for guidance in course selection and schedule approval. The GITAM Student Information System (G-SIS), is available for students to ensure that they meet the programme requirements. The G-SIS is crucial for tracking progress towards degree completion within the specified timeframe. Students, during the registration process, acknowledge the information available on the G-SIS. This signifies their understanding and agreement with the course selections and programme requirements. Information from the G-SIS is shared with the school and the programme owner to monitor each student's academic progress. This helps ensure students are on track to meet degree requirements.

8.3. Pre-requisites

Courses may have pre-requisites as specified in the respective programme curriculum. A prerequisite is a course that the student is expected to have successfully completed before enrolling for a specific course; failing which, the student will not be permitted to register for the course. In certain exceptional cases, the pre-requisite may be waived if the student has alternate exposure; this will require permission from the faculty teaching the course. A minimum grade may be expected from the prerequisite courses in specific courses, such as program electives, which the faculty teaching the course may decide.

8.4. Minimum and Maximum load

The academic load in a semester has to be a minimum of 16 and a maximum of 25 credit hours. If the student has fulfilled all the programme requirements by the final semester, the student may be permitted to register for fewer than 16 credits.

8.5. Registration

Every student must register for the courses opted in a particular semester during the intimated official registration period.

To be eligible to register for classes, a student must belong to any of the following categories

- i. A new student who applies for admission and receives a certificate of admission
- ii. a continuing student from the preceding regular semester who has no financial dues
- iii. a former student, i.e., who has not enrolled in the preceding regular semester or who has availed academic break or is detained and possesses a certificate of readmission

8.6. Adding and dropping of courses

The students who have registered for the courses during the registration period can add or drop the courses through the registration portal. The add/drop period will commence after the completion of the registration period in the University and will continue till seven (7) working days after the commencement of the semester.

- Students making changes during the add/ drop period should comply with the minimum and maximum credit requirements for the enrolled programme.
- Attendance will be calculated from the commencement date of the semester.
- There will be no compensation for attendance or subject matter delivery for the missed classes. The students are expected to use the LMS and ensure that the loss of Teaching-Learning is minimized.

8.7. Late Registration

If the students do not register before the commencement of the semester, they shall approach the office of DoAA with the request to enable the registration within two weeks of commencement of class work, subject to clearing all fee dues, if any. Requests to enable registration after the initial two-week period, must be submitted to the office of DoAA through the respective HOD / HOI / Dean of the relevant school. A student who does not register for a semester or more will be advised to take a break (semester/year) from study and will need to apply for readmission to continue the programme.

8.8. Withdrawal from a course

Students are allowed to withdraw from a course within twenty (20) working days of the commencement of the semester, subject to maintaining a minimum of 16 credits in a semester (except the final semester).

8.9. Withdrawal from the term

A student who wishes to withdraw from the term can do so by applying through the registration portal. Exemption/refund of the tuition fee will be considered for the respective semester if the student withdraws before the registration period. No refunds/ partial refunds are given after the registration period has started for the semester. A student who withdraws from the semester has to apply for readmission and pay the readmission fees to continue in the programme.

9. Grades and grading system

GITAM follows the mixed mode of evaluation procedure, viz., absolute and relative grading systems for all its credited courses. At the end of the semester, a student is assigned a 'Letter Grade' for each course in which they are enrolled, based on their performance in all the course evaluations during the semester. The letter grade and its corresponding 'Grade Point' represent the outcomes of qualitative and quantitative assessments of a student's performance in a course. Detailed information on the award of grades in a course is provided in the [Evaluation Policy](#).

The students who already have CE marks (till the AY 2024-25), will continue the existing practice following the R21UG Academic Regulation (Version 1.5A).

9.1. Computing Grade point averages (SGPA, CGPA)

The procedure adopted for computing the grade point average for the semester and cumulative is as follows:

Semester Grade point average (SGPA) for a semester is calculated as:

$$SGPA = \frac{\sum_{i=1}^n Ci \cdot Gi}{\sum_{i=1}^n Ci}$$

where 'n' is the number of courses taken by the student in a semester.

'Ci' represents the number of credits allotted to the course 'i'.

'Gi' represents the grade points secured by the student in course 'i'.

Cumulative Grade Point Average (CGPA): It is calculated as

$$CGPA = \frac{\sum_{i=1}^m Ci \cdot Gi}{\sum_{i=1}^m Ci}$$

where 'm' is the number of courses graded to date.

'Ci' represents the number of credits allotted to the course 'i'.

'Gi' represents the grade points secured by the student in course 'i'.

The SGPA will be awarded to the students for all the registered courses in a semester. The credits of the failed courses shall also be considered while calculating SGPA/CGPA in a given semester. For cases where multiple attempts have been made to get a letter grade, the last successful attempt will be used for the CGPA calculation. However, the courses which contribute towards higher CGPA will be considered for inclusion.

Grades earned in courses (including practical courses) over and above the required credits under any category in a specific programme are excess credit courses (extra courses) and shall appear on the respective semester grade cards and will be marked with a “#” in the Consolidated Marks Memo (CMM). These grades will be excluded from the final CGPA computation. A suitable disclaimer shall be added in the CMM.

Extra courses with grades F (Fail), R (Repeat), or U (Unsatisfactory) shall be excluded from CGPA calculation and shall not appear in the CMM if the student has fulfilled the minimum credit requirement for the award of the degree.

In the case of Study Abroad, Twinning, Joint or Dual Degree Programmes, the CGPA will be calculated according to the respective policy applicable and prevailing at the time of joining the programme.

9.2. Award of class

The cumulative grade point requirement for the award of the class is as follows:

Class	CGPA required
First-class with distinction	≥ 8.0*
First-class	≥ 6.5
Second class	≥ 5.5
Pass class	≥ 5.0

*In addition to the required CGPA of 8.0 or more, the student must have necessarily passed all the registered courses in the first attempt. Distinction will not be awarded if the student fails in ANY subject.

10. Evaluation system

The course faculty will announce the framework of evaluation. Typically, the components include (not limited to) Assignments, quizzes, presentations, fieldwork, report writing, module tests, viva voce, examination etc. Detailed information on the award of grades in a course is provided in the [Evaluation Policy](#), for the courses offered from the AY 2025-26 onwards. However, the courses offered/delivered till the AY 2024-25, will continue the practice followed in the R21UG Academic Regulation (Version 1.5A).

10.1 Announcement of results

The Controller of Examinations (CoE) will announce the students' results at the end of each semester. Students will be able to access their grades in the Student Information System. If there is a requirement for a certified physical copy, students may request the Directorate of Evaluation.

10.2 Withholding of Results

Results may be withheld if

- The student has any outstanding fees, fines, or other charges to the department/Institute/ School/ University
- Action arising out of malpractice is pending
- Action arising out of indiscipline is pending

Students may view their sessional answer scripts during the designated period at the prescribed venues. If a student wishes to request re-totaling or re-evaluation, they must do so within five working days from the last date of the announced viewing period, along with payment of the prescribed fee.

10.2.1 Supplementary Examination

A student having an "R", "U", "Ab" or "F" grade is permitted to appear for the supplementary examination every June for the course by paying the prescribed course fee, which will be notified by the Directorate of Evaluation. The amount is subject to revision each year. The total number of supplementary exams a student can take in a year and the applicable grade caps can be referred to in the [Evaluation Policy](#). Students who already have CE marks in AY 2024-25 will continue the practice mentioned in R21UG Academic Regulation (Version 1.5A).

"F" grade of MOOC courses should be cleared only through MOOC platform unless; the student is in the final semester of study.

11. Academic Progression

11.1. Attendance policy

The students are expected to maintain 100% attendance in all the courses registered. However, the student's minimum overall attendance of all the courses put together in any semester should be 75% or greater. Also, the students meeting the minimum attendance requirement shall only be allowed to take Sessional-I and Sessional-II. For additional information, refer to [Evaluation Policy](#) & [Attendance Policy](#).

11.2. Academic break

Students of GITAM are expected to complete their studies without any interruption. However, they can avail academic break with prior approval.

11.3. Academic probation

If a student fails to earn the required credits to be promoted to the next higher semester, the student will be put on academic probation for the next academic year. The student can rejoin the programme upon meeting the required criteria at the end of the academic probation period. If a student is on academic probation for TWO continuous years, it will lead to dismissal from the programme.

11.4. Minimum standards for academic promotion

The student should earn a minimum of 60% of the total registered credits before progressing to the third academic year, failing which the student will be put on academic probation. Students should clear 80% of credits up to the preceding year when entering the programme's final year. In addition, the courses registered during the first year in the following categories, viz., Faculty core, Programme core, and University core categories, have to be cleared before entering the final year of study.

11.5. Readmission

Students who are on an academic break can apply for readmission by paying the prescribed fees. Readmission can be applied for twice in an academic year. The candidates should apply for readmission to the Hol at least 30 days before the commencement of the semester.

11.6. Academic dismissal

Dismissal is enforced on a student in the following situations:

1. If a student is involved in any disciplinary issue and the concerned Committee recommends dismissal.
2. If a student is on academic probation for TWO consecutive years, Dismissal leads to the student's permanent separation from the University.

12. Degree Requirements

The undergraduate degree will be for a 4-year duration for the programmes offered by the Schools of Computer Science and Engineering and Core Engineering. The BoS suggests the minimum credits required under each category of courses, total credits for the programme, and the non-graded courses to be satisfactorily completed to be eligible for the award of degree, and the same is approved in the AC. The approved requirements are duly notified in the curriculum copy.

12.1. Additional Learning

Students can opt for additional learning to broaden their studies in another discipline or deepen their knowledge in their chosen field. Further learning by earning additional credits may lead to a minor, double major, or Honours programme and a major degree. Additional credits will require the payment of extra fees, which will be announced when the course is being taken.

12.2. Minor

The Minor programme is a coherent area of study that is not covered in the programme the student has opted to study. An illustrative example is given below

A student of Mechanical Engineering chooses a minor in Computer Science. Upon successfully completing the major and minor programme requirements, the student will be awarded a degree such as B.Tech. Mechanical Engineering with a minor in Computer Science.

12.2.1. Rules and regulations for Minor programme

1. The student can choose a minor programme from a department/School other than the one they opt to enroll in for the primary degree programme. The courses required for a minor programme may be selected in any semester, as long as it does not exceed the maximum number of credits per semester.

2. Individual departments can also offer minors, which can be a specialization in a particular area of interest.
3. Students can earn their Minors from other Schools, and the BoS of the minor programme will specify the requirements.
4. The maximum number of credits for a minor programme is twenty-four (24).
5. The credits earned in the major programme are also considered while computing the requirements of the minor programme, but should not be less than 18(eighteen).
6. Students can enroll in the minor programmes from the second semester and the major programme courses to fulfil the credit requirements for earning a major and a minor.
7. To successfully complete minor programmes, the student should secure at least a passing grade (P) in all the courses. If the student gets a fail grade (F), they have to reappear for the same course for grade improvement similar to other courses in the major programme.
8. Attendance criteria and all the remaining requirements for completing the courses enrolled under the minor programme are similar to those registered for the major programme.
9. For a UG student in Engineering if a student opts to pursue a minor, they may be required to pay for each extra course enrolled, i.e., for the credits exceeding the minimum number of credits required for a programme. For example, a student pursuing a major in "Mechanical Engineering" will require a minimum of 160 credits for the award of the degree. If there is a registration for excess credits, the student should pay for the additional credits. The cost/credit depends on the chosen minor programme.
10. The student can opt out of the minor programme before completing all the courses in the basket. In that case, the student can choose one of the following options to utilize the credits earned as part of the minor programme.
11. Students can use the credits earned towards a minor to meet the open elective requirements of the major programme.
12. The student can store the extra credits in the ABC and leave with the major degree. Later, the candidate can redeem these credits from ABC and utilize them for awarding any academic degree if possible. This is subject to the validity of the credits in force.
13. Minor programme details will be printed on the backside of the "PCMG" under the separate heading "Minor Programme".
14. For students in the UG programmes in Humanities and Sciences, student is required to complete the minor requirements for the award of the major degree.

12.3. Honours programme

The students can strive for excellence in their own/chosen fields or disciplines by registering for the Honours programme. The students who have a strong academic standing (CGPA of 9.0 at the end of II semester) will be eligible to pursue the Honours programme.

12.3.1. Rules and regulations for the Honours programme

The student who opts Honours programme can register for the additional courses along with the major programme and secure the required number of credits. The concerned BoS prescribes the additional credits required for the Honours programme.

1. Any individual department/school can offer the Honours programme. The BoS of the

- department/School will prescribe a set of relevant courses to be studied, the type of course to be pursued, etc., under this Honours programme. The student can select the courses from the basket based on their interest and earn the required number of credits along with the major programme.
2. The students can enrol/register for courses prescribed in the Honours programme from the III semester onwards, along with the major programme, and earn an Honours degree.
 3. If a student fails to meet the requirements for securing an Honours degree, the student will be awarded a Major in that programme, subject to fulfilling the graduation requirements for the programme.
 4. The student can opt-out of the Honours programme before completing all the courses in the basket. In that case, the student can choose one of the following options to utilise the credits earned as a part of the Honours programme.
 - i. The completed courses may be used for Programme Electives in the major programme if possible. Otherwise, they may be converted to Audit courses.
 - ii. The student can store the earned extra credits in the ABC and leave with the major degree. Later the candidate can redeem these credits (within the specified duration) from ABC and utilise the credits for the award of another academic degree (if possible).
 5. If the student opts to pursue the Honours, they may be required to pay additional fees for each extra course enrolled, i.e., for the credits exceeding the minimum number of credits required for a programme. For example, a student pursuing Honours in "Electrical and Electronics Engineering" will require a minimum of 160 credits for the award of the degree. If there is a registration for excess credits, the student should pay for the additional credits. The cost/credit depends on the chosen Honours programme.
 6. To complete the Honours programme, the student should secure an 'A' grade in all the courses on the first attempt.
 7. The attendance and all the remaining requirements for completing the Honours programme courses are similar to the courses registered in the major programme.

12.4. Double Major

The students can choose a "double major" to focus on two main areas of interest. Students pursuing a major programme in any department/school can choose other major programmes either within the same School or in another School—for example, the students pursuing B.Tech. Electronics and Communication Engineering can select "Computer Science and Engineering" as a Double major within the same School of Technology or choose the second major from the School of Business in the specialisation of "Marketing".

12.4.1. Rules and regulations for Double Major

- Any individual department/school can offer their programmes as a "Double Major" programme to other students. For example, the School of Business can offer their "Fintech" or "Business Analytics" programmes to other students who are not pursuing that programme.
- The BoS will provide a set of relevant courses under the "Double major" programme. The student can select the courses from the basket based on their interest and earn the required credits for the major programme. The list of courses, the minimum number of credits, type of course (ex: theory, lab, theory + lab course etc.,) and all other curriculum details related to the double major programme is governed by the concerned BoS offering the programme.

- The student will have to fulfil the programme's course requirements, which is opted for a Double Major. The student will be given exemption from categories like university core, Open electives, and minors completed in the First Major.
- Students can enroll for "Double Major" programmes from the II semester onwards along with the major programme and work towards earning both a major and a "Double Major". If a student fails to meet the requirements for securing a double major degree, that doesn't prevent awarding the major degree. A student can obtain a major degree upon earning the minimum number of credits subject to satisfying the other requirements like minimum programme duration, the minimum required credits in each course category, etc.
- The student can opt-out of the double major programme before completing all the courses in the basket. In that case, the student can choose one of the following options to utilise the credits earned as a part of the double major programme.
 - The student can appeal to consider the completed courses as an open elective (OE)/ Audit course/Programme Elective etc., in the major programme if possible. In that case, the chairperson, BoS, will establish equivalency and recommend for credit transfer. The decision of the BoS committee will be final.
 - The student can store the earned extra credits in the ABC and leave with the major degree. Later the candidate can redeem these credits (within the specified duration) from ABC and utilise them for pursuing another academic degree.
- If the student opts to pursue a double major, the student may be required to pay the prescribed fees for each extra course enrolled, i.e., for the credits exceeding the minimum number of credits required for a programme. For example, a student pursuing a major in "Electrical and Electronics Engineering" will require a minimum of 160 credits for the award of the degree. If there is a registration for excess credits, the students shall pay for additional credits. The cost/credit depends on the chosen double major programme.
- To complete a double major programme, the student should secure at least a pass grade (P) in all the courses. If the student gets a fail grade (F), they have to reappear for the same course for grade improvement similar to other courses in the major programme.
- Attendance criteria and all other remaining requirements for completing the courses enrolled under the double major programme are similar to the courses registered for the major programme.

12.5. Learning by Research

Research experience, when supplemented with academics, will help one to be a better student. Students keen on pursuing a career in Research may choose to do so by taking the first steps at the undergraduate level. Students have the opportunity to participate in academic Research and earn credits for the same. The student may choose to work with any faculty member in the University. The outcome of the work will qualify the student towards attaining the stipulated credits during the programme duration.

Code	Process	Outcome	Assessment	Credit/Grade
UREX0001	Work with a Faculty from	Small development project/prototype	Evaluation committee constituted by the Head of Department	Satisfactory/Unsatisfactory.
UREX0002	2 nd year onwards	Exceptional work carried out and presented in International Conference	Evaluation committee constituted by the Head of Department with at least one member from	Will be considered for three (3) credits with an 'O' grade
UREX0003		Exceptional work carried out and published in a reputed Journal	reputed national level Institutes	Will be considered for four(4) credits with an 'O' grade

In all the above categories, the decision of the evaluation committee is final. The outcome will be reflected in the grade card, subject to recommendation by the evaluation committee.

13. Award of the degree

A student is eligible for the degree award if the candidate has secured the minimum number of credits required for a given programme with a CGPA greater than 5.00, subject to the completion of the minimum duration of the programme. After completing the programme, a provisional certificate cum memorandum of grades (PCMG) will be issued. The PCMG includes the secured grades and class achieved in the chosen programme and specialization, along with grades and CGPA secured by the student in the opted minor/Honour/Double major programmes. The original degree will be presented in subsequent convocation.

14. Lateral admission policy

14.1. Procedure

The candidates seeking admission under the lateral entry category (Inter-University Transfer) into any programme offered by GITAM (Deemed to be University) shall be provisionally admitted only at the beginning of an academic year, subject to satisfying the following conditions.

- Availability of vacancy in the respective programme.
- Submission of Migration certificate
- Submission of Grade card/Marks Memo
- Submission of "No objection certificate" from the concerned Institute/ University where the candidate completed part of the programme.
- Submission of syllabus, rules, and regulations of the concerned Institute/ University where the candidate completed part of the programme.

- Provisional admission of the candidates will be confirmed only after verification of the authenticity of the certificates from the concerned authorities.
- Recommendations of the concerned Board of Studies (BoS) on the eligibility of the candidate for admission into any programme, mentioning (a) the courses for which equivalency is established. (b) The courses prescribed to study.
- 50% of the credits have to be earned at GITAM.

14.2. Establishment of Equivalency

1. The courses studied by the candidates elsewhere for which equivalency is established should carry either the same or more credits than the corresponding courses offered at GITAM.
2. If the credits allotted for a course studied by the candidates elsewhere are less than the allotted credits of the corresponding courses in GITAM, the candidates will be required to repeat such courses, and secure at least a passing grade in GITAM after admission.
3. Notification of the equivalency issued by the Registrar, GITAM shall contain:
 - a. The courses for which equivalency is established.
 - b. The courses prescribed to study in GITAM.

Candidates shall be issued semester Grade cards for only the prescribed courses.

14.3. Calculation of CGPA

The CGPA shall be calculated taking into consideration the grades of courses obtained by the candidates in GITAM as well as the transferred ones.

15. Conduct and Discipline

To maintain a safe, secure, and cohesive learning climate in GITAM, the students are expected to follow the code of [conduct for students](#) in force, as published by the University.

16. Grievance Redressal System

To redress the grievances of the students, there is a grievance redressal mechanism in GITAM. The student may submit a grievance [online](#) or write to the help desk. The student should fill in the essential details on the form and then select "Academic grievance". The student can submit grievances related to the following:

1. Grades, exam procedures, excused absences, class policies
2. Academic advising
3. Faculty performance or faculty behaviour
4. Course content, teaching methodology, etc.
5. Academic probations, suspensions, etc.
6. Academic integrity and the Honor Code
7. Marks memos, PCMG, credits, degree award, etc.
8. Class availability, timings, etc.
9. Online, distance education, MOOCs etc.
10. Any other (specify clearly)

Upload the supporting documents (if any): If the student has any documental evidence to support the claim, then upload the necessary documents with proper file names and references in chronological order of dates and events.

17. Academic Bank of Credits

Academic Bank of Credits (ABC) is an academic service mechanism as a digital/virtual/online entity established and managed by MHE/UGC to facilitate students to become their academic account holders. It paves the way for seamless student mobility between or within degree-granting Higher Education Institutions (HEIs) through a formal system of credit recognition, credit accumulation, credit transfers and credit redemption to promote distributed and flexible teaching-learning. ABC provides mobility within and across various programmes, subject to meeting the admission eligibility criteria.

Example (1): ABC provides mobility across the various programmes viz., undergraduate, certificate, Diploma and PG Diploma etc.

Example (2): ABC provides mobility within the same type of programme, i.e., the student, after pursuing an undergraduate programme of 1st year B.Tech. can move to another undergraduate like BBA or B.Sc. programmes. The credits earned during 1st year of study in B.Tech. can be redeemed for the credit requirements of BBA or B.Sc. programmes.

17.1. Implementation of the ABC scheme

GITAM, recognized by UGC and the Ministry of Education as a Category-I Deemed to be University and accredited by NAAC with an A++ grade, is registered under the Academic Bank of Credits (ABC) scheme. All results and certificates of all students are available in the respective student's ABC account.

17.2. Minimum number of credits to be secured at GITAM

The candidate who wishes to pursue any programme in GITAM and opts to utilize the credits earned in other Institutes through the ABC scheme should acquire at least 50% of the minimum number of credits in the chosen programme from GITAM. In addition, the candidate should ensure the completion of the minimum number of credits in the core subjects as specified in the programme's curriculum.

17.3. Admission in individual courses

GITAM supports the admission in individual courses to the students pursuing UG and PG programmes in other HEI's participating in ABC, subject to the available vacancy in each course. The first priority for Registration in each course will be given to GITAM students. At the end of adding/dropping the course registration period, based on the availability of the vacancy in each course, the programme coordinator will permit the Registration of courses to the students other than GITAM on the first cum first serve basis. The candidate needs to pay the required course fee within the due date to confirm the course admission. The course fee depends on the course credits, type of course (lab, theory, theory cum lab etc.) and the department/Institute which offers the course. GITAM has audio-visual facilities, e-resources, virtual classrooms, studios, high bandwidth internet connectivity to support ODL/online courses and individual course registration.

17.4. Validity of stored credits in ABC

The regulations in force will determine the validity of the credits earned at GITAM or any other HEI.

Nomenclature

- ❖ **ABC:** Academic Bank of Credits
- ❖ **AC:** Academic Council
- ❖ **AICTE:** All India council of technical education
- ❖ **AMC:** Academic Monitoring Committee
- ❖ **B.Tech:** Bachelor of Technology
- ❖ **BoS:** Board of Studies
- ❖ **CCOM:** Course Committee
- ❖ **CBSE:** Central Board of Secondary Education
- ❖ **CGPA:** Cumulative Grade Point Average
- ❖ **CoE:** Controller of Examinations
- ❖ **DoAA:** Directorate of Academic Affairs
- ❖ **FC:** Faculty Core
- ❖ **FCS:** Flexible Credit System
- ❖ **GAT:** GITAM Admissions Test
- ❖ **GATE:** Graduate Aptitude Test in Engineering
- ❖ **GITAM:** Gandhi Institute of Technology and Management
- ❖ **GPA:** Grade Point Average
- ❖ **GRE:** Graduate Record Examinations
- ❖ **HoD:** Head of Department
- ❖ **Hol:** Head of Institution
- ❖ **IQAC:** Internal Quality Assurance Cell
- ❖ **JEE:** Joint Entrance Examination
- ❖ **LMS:** Learning Management System
- ❖ **MHE:** Ministry of Higher Education
- ❖ **MOOCs:** Massive Open Online Courses
- ❖ **NAAC:** National Assessment And Accreditation Council
- ❖ **NAD:** National Academic Depository
- ❖ **NRI:** Non-Resident Indian
- ❖ **OCI:** Overseas Citizen of India
- ❖ **PC:** Program Core
- ❖ **PCMG:** Provisional Certificate cum Memorandum of Grades
- ❖ **PCOM:** Programme Committee
- ❖ **PIO:** Person of Indian Origin
- ❖ **PO:** Program Objectives
- ❖ **SAT:** Scholastic Assessment Test
- ❖ **SCOM:** School Committee
- ❖ **SGPA:** Semester Grade Point Average
- ❖ **SIS:** Student Information System
- ❖ **SWAYAM:** Study Webs of Active–Learning for Young Aspiring Minds
- ❖ **UC:** University Core
- ❖ **UG:** Under Graduate
- ❖ **VDC:** Venture Development Centre
- ❖ **UGC:** University Grants Commission

Definitions

GITAM Admission Test (GAT): GAT Admission test is designed to determine a person's competency level in a specific subject(s) and may be used to determine admissibility to a program.

Bachelors/Undergraduate degree: An academic degree that is given to a student by a college or University, upon the successful completion of course duration and curriculum.

Honours degree: It is an undergraduate bachelor's degree awarded to the students who complete the prescribed set of courses as a part of additional learning in their discipline.

Faculty: The Schools/Institutes dealing with allied subjects shall be grouped into faculties. For example, all engineering institutes/schools in the three campuses of GITAM shall be grouped as one faculty and is named as Faculty of Engineering.

Dean: A person with academic authority over a specific Faculty in the University

Programme: An academic programme grants a degree in a specific discipline or specialization. Each programme comprises of certain types of courses, duration, and the minimum number of credits. Upon the fulfilment of requirements, an academic degree is awarded in that programme. Example: B.Tech Programme, B.Sc. Programme, MBA programme etc.

Academic Year: Two consecutive (one odd + one even) semesters constitute an academic year.

Course: A course is an individual subject in an academic term led by one or more instructors. A course is designed to comprise lectures/ tutorials/laboratory work/ fieldwork/ outreach activities/ project work/ vocational training/viva/ seminars/ term papers/assignments/ presentations/ self-study etc. or a combination of some of these.

Course Code: A Course Code is a unique alphanumeric code that is generated and assigned to the courses created by the institutions. The Course Code helps students to locate the course he/she should be enrolling in.

Course Credit: A credit is a unit that gives weighting to the value, level, or time requirements of an academic course taken at a school or other educational institution.

Core Course: There may be a Core Course in every semester. This is the course which is to be compulsorily studied by a student to complete the requirement of a programme.

Major: It is the domain on which a student focuses primarily during undergraduate study.

Minor: It is awarded to the students who complete the prescribed set of courses as a part of additional learning in their own or other disciplines.

Double Major: A student who meets the major requirements of the two programmes within or outside the faculty will be awarded a "Double Major," and the same will be mentioned on the PCMG as a major degree (specialization) and Double Major in (specialization).

Course registration: Course registration means registration for each course that the students opt to study in a semester.

Registration Period: The period during which students register for courses at GITAM every semester.

Add/Drop Period: The period during which the students can make modifications to the registered courses. They can add additional courses or drop the courses already registered.

Class: It is defined as a unique combination of course-slot-faculty.

Grade Point: It is a numerical weight allotted to each letter grade on a 10-point scale. Letter Grade is an index of the performance of a student in a course. Grades are denoted by letters viz., O, A+, A, B+, B, C, P and F.

Semester Grade Point Average (SGPA): It is the weighted average of the grade points earned by the student for the courses registered in a semester.

Cumulative Grade Point Average (CGPA): It is the weighted average of the grade points earned by the student for all the courses registered.

Grade Card: Based on the grades earned, a certificate shall be issued to all the registered students after every semester. The grade certificate will display the course details (code, title, number of credits, grade secured) and SGPA of that semester and CGPA earned till that semester.

Board of Studies (BoS): It is the academic body at the Department/Institute level constituted to advise and report to the Academic Council on all matters related to education, teaching and learning, research, evaluation, curriculum development, introduction of new programmes, and all other academic-related issues.

Directorate of Academic Affairs: Academic Affairs is the administrative office in an educational institution that supervises a wide range of educational divisions at a University. This office plays a lead role in curriculum design and implementation.

Academic Council: It is the principal academic body of the University and is responsible for maintaining standards of education, teaching and learning, research, evaluation and shall exercise other academic duties and functions conferred, subject to the provisions to the Memorandum of Association, Rules, and Bylaws.

Academic Bank of Credits: It will offer flexibility to the students and executives to promote liberal education. The students will be account holders to whom the bank will provide credit accumulation, credit transfer, and credit redemption services. After the accumulation of credits, a student can redeem these for acquiring a degree.

ANNEXURES

ANNEXURE – I

University Core Courses

S.No.	Course Code	Name of the Course	Grading	Credits	Remarks
1	CLAD1001	Emotional Intelligence & Reasoning Skills	Letter Grade	1	
2	CLAD1011	Leadership Skills & Quantitative Aptitude	Letter Grade	1	
3	CLAD1021	Verbal Ability & Quantitative Ability	Letter Grade	1	
4	CLAD1031	Practicing Verbal Ability & Quantitative Aptitude	Letter Grade	1	
5A	CLAD2001	Preparation for Campus Placement-1	Letter Grade	1	Students can choose one out of three.
5B	CLAD2011	Preparation For Higher Education (GRE/ GMAT)-1	Letter Grade		
5C	CLAD2021	Preparation for CAT/ MAT-1	Letter Grade		
6A	CLAD2031	Preparation For Campus Placement-2	Letter Grade	1	Students can choose one out of three. The same track is to be followed by the students. Ex: 5A-6A, 5B-6B, 5C-6C.
6B	CLAD2041	Preparation For Higher Education (GRE/ GMAT)-2	Letter Grade		
6C	CLAD2051	Preparation for CAT/ MAT-2	Letter Grade		
7	ENVS1001	Environmental Studies	Pass/Fail	3	MOOC
8	PHPY1001	Gandhi for the 21 st Century	Pass/Fail	2	MOOC
9	DOSP10XX	Sports-1	Pass/Fail	2	Students can choose any 2 courses out of 5
10	DOSL10XX	Club Activity	Pass/Fail	2	
11	DOSL10XX	Community Service	Pass/Fail	2	
12	FINA3001	Personal Financial Planning	Pass/Fail	1	
13	MFST1001	Health and Wellbeing	Pass/Fail	1	Personal Financial Planning is a MOOC Course
14	CSEN1001	IT Productivity Tools	Pass/Fail	1	MOOC - Mandatory course. Student has to complete during the time of Induction Program
15	POLS1001	Indian Constitution and History	Pass/Fail	2	MOOC
16	VEDC1001	Venture Development	Letter Grade	2	
17	LANG1012	Communication Skills in English – Intermediate	Letter Grade	2	
18	LANG1022	Communication Skills in English – Advanced	Letter Grade	2

GANDHI INSTITUTE OF TECHNOLOGY AND MANAGEMENT (GITAM)

(Deemed to be University)

Visakhapatnam | Hyderabad | Bengaluru

MEDICAL LEAVE OF ABSENCE (FORM – A) FOR MINOR ILLNESS/INJURY

PART-A: Student Details

Name of the student	:				
Registration Number	:				
Department	:				
Programme Pursuing	:		Year of Admission	:	
Institute	:		Campus	:	
Mobile Number	:		E-mail ID	:	

PART-B: Parent/Guardian Details

Name of the Parent/Guardian	:				
Address for Communication	:				
Mobile Number	:		E-mail ID	:	

PART-C: Details of Medical Leave of Absence

Details of Sickness or Injury			
Date of Commencement of ML		Possible Date of Return	
Total Number of days			

DECLARATION

I hereby declare that the information provided about my sickness/Injury is true and accurate on the dates shown above. I acknowledge that false information will result in disciplinary action.

Date:

Signature of the Student

I agree the above fact and his/her leave on the above said days with my knowledge. I know that my ward must have secured a minimum of 75% of overall attendance which is eligible for appearing University Theory/Practical examinations.

Date:

Signature of the Parent/Guardian

**MEDICAL LEAVE OF ABSENCE (FORM – B) TO
AVAIL ACADEMIC BREAK**

PART-D: Medical Authorization

About Medical Condition of the student		
Authorization		
I affirm that the information regarding Medical Leave and the student's medical condition is true and accurate to the best of my knowledge. I authorize to process the request for Medical Leave.		
Name of the Medical officer	:	
Designation	:	
Signature	:	
Date	:	

Signature of Faculty Advisor	
Name: Designation:	
Signature of the HoD/HoI	
Signature of the Dean/ Campus In-Charge	

ANNEXURE - III
